7.1.5: Institution is committed to maintenance of cleanliness, sanitation, green cover and providing a pollution free healthy environment.

RESPONSE :

At SSPM Sardarshar, we take immense pride in our efforts to create an environment that fosters learning and well-being while also preserving the natural world around us.

Maintenance of Hygiene and Cleanliness:

Maintaining hygiene and cleanliness is of utmost priority at our institute. We have a dedicated team of cleaning staff who work tirelessly to ensure that every corner of our campus is spotless. Classrooms, corridors, toilets and common areas are cleaned daily to provide a clean and hygienic environment to students, faculty and staff. Waste management is also handled efficiently, with strict recycling and waste disposal protocols implemented to reduce our environmental footprint.

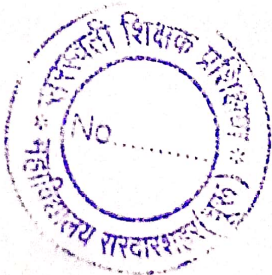

Greenery and Landscaping:

Our institute recognizes the importance of greenery in improving the overall environment and promoting environmental sustainability. We have planted lush green trees at the entrance of our campus which helps in creating a lively environment. As a part of the students' initiative, we have a garden in the college. These green spaces not only beautify our campus but also provide a sense of relaxation and connection with nature.

Pollution-free environment:

To ensure a pollution-free environment, we have implemented several measures. Our transportation system follows strict emission norms, and we actively promote carpooling and use of public transport among our students and staff. In addition, our institute has adopted eco-friendly practices such as rainwater harvesting, drinking water harvesting, and ensures that there is no pollution in the college.

We also organize awareness campaigns and workshops on environmental issues, including air and water pollution, waste management, and sustainable living.

These events empower our stakeholders with knowledge and inspire them to make eco-conscious choices both on and off-campus.

Furthermore, we regularly monitor air and water quality within our premises and collaborate with local authorities to ensure that our environment remains free from pollution. We take pride in consistently meeting and often exceeding the regulatory standards for environmental quality.

Our institution is fully committed to maintaining cleanliness, sanitation, green cover, and a pollution-free healthy environment. Our institution's efforts in this regard go beyond mere compliance with regulations; they reflect our deep-seated belief in the importance of sustainable practices and the well-being of our students, faculty, and the community at large. We are committed to continually improving and innovating in our pursuit of a cleaner, greener, and healthier environment for all.
